House footprint (external)	122.1 m²
Garage (external)	22.4 m²
Covered patio	18.8 m²
Total under roof	163.3 m²
Net internal floor area	128.0 m²
Site	600 m²
Coverage (house + garage)	24 %

Notes

1. Concept design for discussion. Not for construction; structural, energy (SANS 10400-XA) and municipal checks still required.
2. The family bathroom is internal: ventilate with an extractor fan and add a skylight through the flat roof.
3. Flat roof: concealed IBR sheeting at about 2° behind a parapet; face-brick feature wall on the north facade beside the living room.
4. The pool needs a compliant safety fence or cover (SANS 10134).
5. Patio roof carried on two 150 mm square steel posts and a steel beam (engineer to size).
6. Street wall has a 1.0 m pedestrian gate and a 3.2 m sliding driveway gate.
7. The plan data in cozy-3-bed-plan.json uses the same coordinates (metres, origin at the south-west corner of the site, wall centrelines).
